Your First Source
For RV Chassis Performance

**Introducing the latest in the line of
REK ride enhancement kits, produced
by
Source Engineering Inc.**

After one year in development the all new REK-206 has been engineered exclusively for the 2004-2013 Freightliner XC chassis with the I-beam front axle. The REK-206 offers unparalleled performance and drivability, never before available for the XC platform.

- Drastically reduce body roll at both low and high speeds.
- Greatly reduce driver fatigue and increase comfort.
- Eliminate nose dive under braking.
- Excellent maneuverability at road speed, no more "tail wag".
- Installs easily in 4-5 hours by almost any RV service facility.
- Custom tuned SEI Platinum Series shocks 60mm front and 46mm rear manufactured exclusively for Source Engineering Inc by Bilstein.
- No more being pushed around by trucks or windy conditions.
- All Components in this kit engineered by SEI, no off the shelf parts.
